Lab Sessions_

1. Capacity building of academic staff and institutions – room ZRAK

exploring current requirements of digital pedagogy and a reimagining/reuse of existing frameworks of digital competence:

- Digital transformation journey: building digital capacity and competence in teaching staff for blended learning.
- Let's get digital: Digital capabilities, courses and resources for teaching staff (to enable you to teach online and support flexible learners effectively in higher education.)
- Challenges and hurdles related to digital education in HEIs.

2. Embedding digitalisation into the curriculum – room SONCE

- Rethinking quality and excellence in digital teaching and learning.
- Designing meaningful formats: what elements should hybrid teaching offer to enhance collaborative learning.
- Mobility for ALL: how to integrate new mobility formats D.
- Digital learning environments.

3. Intercultural communication in digital education – room VODA

- Building a community across physical and digital learning environments.
- Fostering pedagogical approaches: away from broadcasting towards an active communication.
- Learners voices: creating spaces and formats to encourage communication between learners.
- Learner-centred approach.
